- We reviewed several website design firms before launching ScholarBuys. Once we met with Hollie from Niagara Creative we felt comfortable that she could meet our needs. Even though we were in a hurry, Hollie took the time to first learn about our business, our products, and our needs before developing our site. She did a wonderful job of reflecting our personality through the website she created. Hollie can easily take an idea and move it to reality with very little effort and manage to have it say exactly what you intended. I can easily refer her work to anyone with website needs. Choosing to work with her turned out to be one of the best choices our business made before launching. Top qualities: On Time, High Integrity, Creative

Testimonials and References for Hollie Szadowski

- I just wanted to say how pleased I have been with the service I've received from Hollie Szadowski at Niagara Creative. The design of my new website has been fantastic and she has been great to work with.

I'm really happy about the professional look that the site has and the content she was able to piece together from the scattered information I provided. It is clear that she has strength not only on the creative and graphical side, but also marketing. I showed the website to someone deeply involved in my industry and they thought it was an outstanding website to attract new business.

She's done a great job, not only on the creative side, but also in meeting her promises and deadlines which, for me, were very important. I would not hesitate in recommending Hollie Szadowski to anyone who wanted to create a professional marketing appearance for their company.
